

### **REMARKS/ARGUMENTS**

In response to the Examiner's further Office Action of December 11, 2008 the Applicant respectfully submits the accompanying Amendment of the claims and the below Remarks.

#### ***Regarding Amendment***

In the Amendment:

independent claim 1 is amended to clarify that the drive means is mounted to the support structure, the cartridge is removably mounted to the support structure and comprises the feed means in contact with print media unrolled from the print media roll, the drive means has a coupling arranged to couple with the feed means of the cartridge and with a roller of the support structure, and the roller contacts print media rolled on the roll of print media through an opening in the cartridge. Support for these amendments can be found at page 14, line 1-page 15, line 16 of the present specification; and

dependent claims 2, 4, 5, 9-13, 24 and 25 are unchanged.

It is respectfully submitted that the Amendment does not add any new matter to the present application.

#### ***Regarding 35 USC 112, first paragraph Rejections***

It is respectfully submitted that the amended independent claim 1 is based on enabling disclosure, because at page 15, lines 5-9 of the present specification it is clearly disclosed that the primary drive roller 109 engages the paper roll 75

#### ***Regarding 35 USC 103(a) Rejections***

It is respectfully submitted that the subject matter of amended independent claim 1, and claims 2, 4, 5, 9-13, 24 and 25 dependent therefrom, is not taught or suggested by Silverbrook '854, '088, '555 and '908 either taken alone or in view of one another, because contrary to the Examiner's contentions, the roller 1130 of Silverbrook '854 only contacts print media which is unrolled from the roll of print media due to the ribs 1132 which separate the roller 1130 from the rolled print media, as is clearly illustrated in Figs. 164B and 164C, and in any case, the roller 1130 is part of the cartridge 1100 not a roller mounted to the support structure of a printing system as is required by the claimed invention.

Accordingly, the arrangement disclosed by Silverbrook '854 (and Silverbrook '088, '555 and '908) is clearly different than the arrangement of the claimed invention.

It is respectfully submitted that all of the Examiner's rejections have been traversed. Accordingly, it is submitted that the present application is in condition for allowance and reconsideration of the present application is respectfully requested.

Very respectfully,

Applicant/s:
